

## Spray drying plants D 2000

---

### Highlights

- Low energy consumption
- Economically efficient production with dust recycling
- Low emission values
- Waste heat utilization
- Combustion air filtration
- Prefabricated construction
- FDA approved

### Characteristics

- Cyclone dust extraction
- Dry dust extraction
- Wet dust extraction
- Gas heating
- Oil heating
- Entry temperature 250-550°C

### Spray drying plants Type D 2000

Water evaporation capacity:	2.000 kg/h
Diameter:	6.500 mm
Cylindrical height:	8.200 mm
Total height:	17.000 mm
Granulate output at 40% H <sub>2</sub> O, porcelain 2% residual moisture:	3.160 kg/h
Technical ceramics 25% H <sub>2</sub> O, 0,5 % residual moisture:	6.122 kg/h
Space requirement L/W/H:	13/15/17,5 m

### Technologies

- Pressure nozzle
- Spraying cone monitored by camera
- Residual moisture measurement and control
- Batch Analyzer
- Semi- and fully automatic cleaning device
