

Isostatic Press DK 800 H

Highlights

- High stability and precision
- Centralized support of all platens in pressing position
- Set-up in the press, minimal space requirement
- IPG programming
- Low energy consumption
- CNC closed-loop controlled movements

Characteristics

- Max. number of upper levels: 2
- Max. number of lower levels: 2 + core rod
- Closed-loop controlled die movement
- Modular set-up, adjusted to customer specifications
- Closed-loop controlled part transfer
- Chamfering presses/press combination with up to 3 machines

Type of press DK 800 H

Pressing force:	8.000 kN
Upper punch stroke:	350 mm
Die travel:	85 mm
