

## Servo-motorized CNC press EP 16 M ULTRA digital

---

### Highlights

- Highest precision and productivity
- Intelligent energy management system
- Minimal maintenance costs
- Low noise emission
- Quick tool change
- No hydraulic oil
- Multi-platen capability
- Force measurement with enhanced resolution
- IoT prepared

### Characteristics

- Driven die (withdrawal method)
- Tool installed directly
- Floor assembly
- Upper tool level maximum: 1
- Lower tool level maximum: 2
- Electrically driven core rod

### Positioning accuracy

Upper and lower (die) drive:	+/- 0,001 mm
Core rod:	+/- 0,01 mm
Filler drive:	+/- 0,1 mm

### Type of press EP 16 M ULTRA digital

Pressing force:	160 kN
Upper punch travel:	210 mm
Filling height:	130 mm
Core rod travel:	130 mm
Force additional lower	80 mm

tool level:

### Technologies

- IPG
- Precision quick-clamping system
- Automation
